Date: 5/5/2010- Version 2

Technical Bulletin H06

#### Pokelsalz Pickle p/n 38387 (Wiltshire Style)

Pokelsalz Pickle has been developed as easy-to-use complete cure mix, which when simply dissolved in water is immediately ready for use. The cure mix contains the necessary ingredients for successful curing i.e. nitrate and nitrite, and salt to produce more traditional-style cured meats. It is ideally suited to smaller processors where meats are soaked with or without prior pumping.

#### COVER BRINE SOLUTION:

	%	Kg
Pokelsalz Pickle	20.0	4.54
Cold Water	80.0	18.16

#### Method

1. Weigh out the water.
2. Dissolve the Pokelsalz cure. Stir/agitate until completely dissolved. The brine is then ready for use. The brine solution should be kept below 5 degrees Centigrade. If a sweeter cure is desired add a additional 4.0% (0.9 Kg) sugar to the brine.
3. The amount of brine required is half the weight of the meat that you are curing (50 parts brine:100 parts meat.). If required some of the brine solution can be injected into the meat. Sufficient brine must be left to fully cover the meat.
4. Allow to cure one day per half inch (13mm) thickness of meat, plus 2 days.
5. After use the brine should be discarded.

#### LABELLING/LEGISLATION

The product must be labelled in compliance with the current Regulations – 2006/52/EC governing the use of nitrites and nitrates in meat products. The official journal can be found on the following website: [www.opsi.gov.uk](http://www.opsi.gov.uk) For specific queries on Labelling of final products, customers are recommended to discuss the matter with their Local Trading Standards Department. For further information or advice on the product formulation or use of the ingredient please contact your sales representative or Kerry Ingredients on 01275 – 378500.

Whilst all care is taken in the composition of the above information, Kerry Ingredients cannot accept liability in respect of its use.
